

Dear Sir,

INTEL development centers in Haifa & Jerusalem decided to rize the level of readiness of it's Emergency power systems by treating the fuel storage and day tanks of the emergency power generators.

Phase one- all Fuel tanks was cleaned and fuel brought to it's optimal quality, approved by Authorized Laboratory. That phase was made without interruption to emergency readiness.

Phase two- Installations of Automated filtration systems on each of day tank and storage tanks. For keeping the fuel in pristine condition at all time.

Thanks to Techno-Yam for the professional and good work.

Thanks to you INTEL have a reliable Emergency power

Lior Abraham
